Purpose of the Campus Master Plan Update

Since 1996, when RISD's last — and first — comprehensive campus master plan was completed, RISD has experienced significant changes in its physical environment, campus layout, facilities and land ownership, and academic and museum leadership. Where the campus was once comprised of a core campus with a small southern outpost (Fig. 3a), RISD now has expanded landholdings along the riverfront to the south and established a major presence across the Providence River, in downtown Providence, that will grow significantly when the renovations at 15 Westminster Street are completed. (Fig. 3b)

Campus beginnings, 1878 — Hoppin Homestead Building

Campus vision, 1996 — Campus center from Westminster Street

Future campus, 2008 — Chace Center, designed by Rafael Moneo

In Fall 2000, an academic plan — a conspicuous absence during the 1996 study — has established new goals and priorities for the evolution of the School. Objectives include:

- Improving physical facilities
- Increasing ethnic, socio-economic, & gender diversity
- Advancing digital & information technologies
- Expanding interdisciplinary teaching & learning
- Developing a greater sense of community

[Visit http://intranet.risd.edu/faculty/meetings/ on the Internet to review the full text of the *Academic Plan* by Joe Deal, Provost.]

While some of the recent physical changes were anticipated and recommended in the 1996 Campus Master Plan, others were added to the plan with occasional review by Chan Krieger & Associates, the primary consultant to RISD for the 1996 Plan. With the anticipated completion of the highest priority projects identified in the 1996 Plan within the next few years, this 2004 Campus Master Plan Update was prepared to provide a status report of campus master planning issues, including: (1) documenting changes on the campus since the 1996 plan; (2) updating primary data in support of the campus database; and (3) identifying planning issues for the next comprehensive campus master plan.

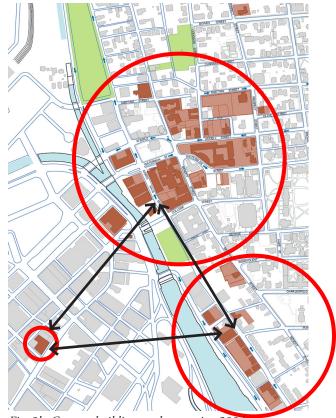

Fig. 3b Campus buildings and properties, 2004

■ 1996 Priority Recommendations

Priorities Completed or Ongoing

The four highest priority recommendations identified in the 1996 Campus Master Plan were: (1) a new Library; (2) expand and rationalize studio and teaching spaces; (3) expand Museum facilities; and (4) expand student housing by 300 beds. By 2004, each recommendation has been initiated and all will be fulfilled when the planned RISD Center (Fig. 7b) is completed in 2008. A complex of three projects — Chace Center, renovation of Memorial Hall, and renovations to several areas of RISD Museum — RISD Center will include improvements for academic, museum, and student-oriented programs that will be discussed in various sections of this report.

PRIORITY #1 — A New library

The Library will be located in the first two floors and basement of 15 Westminster Street. Currently under renovation and scheduled for completion in 2006, the new space will provide 35,000 net square feet of space (an increase of 200 percent) for library functions, and an elegant and historic reading room in the former historic banking hall. (Fig. 4a) The long row of the Library's tall windows will offer visitors a panoramic view of the riverfront and passersby an attractive and active edifice both day and night. (Fig. 4b) The upper floors of the building will provide housing to nearly 500 students (see Priority #4.) To complement the Libary as a student hub and social space, a new café will be provided across the ground floor lobby. Vacated library spaces in College Building (fig. 4c) will provide space for various academic space, studios, classrooms, and office needs.

Summary of Library Space:

Existing Library 12,000 NSF

NEW LIBRARY (2006) 35,000 NSF

Net change 23,000 NSF

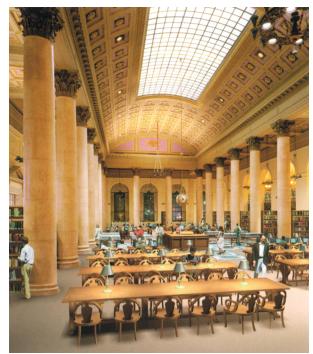

Fig. 4a Early concept of new reading room in former bank hall

Fig. 4b Night view of new Library

Fig. 4c Existing Reading Room in College Building

PRIORITY #2 — New & Reorganized Academic Space

Improvements to academic space began during the development of the 1996 Campus Master Plan. Adaptive reuse of the former Roitman Furniture Building (Fig. 5a) located at 161 South Main Street facilitated the consolidation and expansion of the Industrial Design (ID) Department. The former ID spaces, in eight separate locations, provided modest expansion space for several departments, including the newly established Furniture Department.

By 1998, significant academic expansion and reorganization was provided through the adaptive reuse of the Providence-Washington Building (Fig. 5b) at 20 Washington Place. Departmental expansion included: Furniture, Art and Design Education, Continuing Education, Foundation Studies, Office of Information Technology, President's Office and other administrative offices, and a 'one-stop-shop' for student services.

By 2004, RISD has firmly reestablished its presence in downtown Providence, initially in the renovated Fletcher Building (Fig. 5c), at 212 Union Street, for graduate student studios in Glass, Painting, Photography, Printmaking, and Sculpture. Another purchase, the adjacent Mason Building at 169 Weybosset Street, established The Center for Integrative Technologies to greatly expand RISD's professional development programs, and provides space for: The Center for Design + Business Entrepreneurship Center for incubator businesses; Continuing Education classrooms; Graphic Design and Textiles graduate studios; new homes for Interior Architecture and the Division of Graduate Studies; the new Digital Media graduate program; the relocated Sol Koffler Graduate Gallery; and a graduate printshop, woodshop, and classrooms. Additional academic space in the future RISD Center (Fig. 5d) will increase total new academic space to nearly 124,000 net square feet — over 40 percent above 1996. (Table 6)

Fig. 5a 161 South Main Street from the riverfront

Fig. 5b 20 Washington Place from the riverfront

Fig. 5c Fletcher Building (left) and Mason Building (right)

Fig. 5d Proposed 2D studio in the Chace Center by 2008

In 2000, RISD purchased 8 buildings and 3 parking lots along South Main Street — known as SOMA. (Fig. 6b) The properties remain commercial and RISD is committed to maintaining commercial uses at the ground level facing Main Street. If the upper levels become available for reuse, up to 28,000 net square feet of existing space may be reassigned for RISD use. The (re)development potential of the properties is currently being studied.

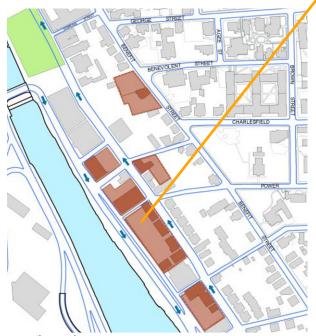

Fig. 6b South campus properties

PRIORITY #3 — Museum Expansion

The Museum is the largest facility within RISD's core campus. (Fig. 6c) Finding sufficient space to expand the Museum beyond its current boundaries is a difficult challenge due to several circumstances, including:

(1) The Museum is located on the densest block within RISD's landholdings, competing for space with the most highly used and prized academic facilities, including: Metcalf, Waterman, and College Buildings; Carr House; and Memorial Hall — where academic programs also need additional space to fulfill pro-

- grammatic requirements.
- (2) The Museum is comprised of several historic wings, within an historic district, presenting unique design and zoning challenges when considering renovations, modifications, and/or additions.
- (3) The Museum is located on a hill (Fig. 7a) and over an underground transit tunnel that impose significant engineering and financial premiums on new additions to, and modifications of, the Museum.
- (4) The Museum is located next to the Central Power Plant, a difficult facility to build around and prohibitively expensive to relocate.

The Chace Center

The future Chace Center (Fig. 7b) will provide important new opportunities for the Museum to begin implementing its *2000 Museum Plan* completed by M. Goodwin Associates and expand upon its multiple roles:

- (a) as an integral part of RISD's academic mission
- (b) as Rhode Island's premier art museum
- (c) as a family museum sponsoring a variety of lectures, gallery talks and other events for adults, an array of programs for teachers, lively activities for families, and a full roster of community programs

The Chace Center, designed by Rafael Moneo, will offer new dedicated museum space to expand the RISD Museum by approximately 18 percent. (Table 7) The orientation of the Museum will be significantly transformed, particularly in new public spaces shared with the School, such as:

(a) new outdoor pedestrian spaces, including: a plaza on Main Street (Fig. 7c.1), a covered archway linked to Memorial Hall and College Building (Fig. 7c.2), and two open-air public stairways between South Main and Benefit Streets (Fig. 7c.3)

Fig. 7a View towards Benefit Street during Radeke construction

Fig. 7b View of Chace Center from downtown Providence

Table 7 Summary of Chace Center spaces

Summary of Chace Center:

Existing Museum 71,060 NSF

Museum Addition (2008) 13,245 NSF

TOTAL MUSEUM 84,305 NSF

Academic Space (2008) 8,000 NSF

Mid-sized Auditorium (2008) 250 seats

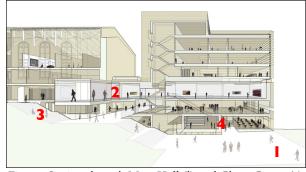

Fig. 7c Section through Mem Hall (l) and Chace Center (r)

- (b) a café (Fig. 7c.4), mid-size auditorium (Fig. 8a), and expanded museum store all accessible from the lobby (Fig. 8b)
- (c) a prominent new entrance facing downtown Providence. (Fig. 8d)

Additional Chace Center Spaces

In addition to expanding the Museum, Chace Center will also fulfill other important goals established by the 1996 Campus Plan, especially in locating a new civic/community space in Metcalf Lot (Fig. 8c), the cultural and symbolic center of campus where generations of RISD students have congregated and socialized. Among the objectives that The Chace Center will accomplished when completed in 2008 are:

- Provide new studio and classroom space for Foundations and Liberal Arts
- Create a new communal front door in which to enter the Museum and the School
- Establish a gallery for student art
- Enhance the identity and visibility of the institution
 locally, regionally, and internationally
- More effectively engage downtown Providence and visitors
- Provide a special venue for events and activities, including new exhibition spaces for works of art by students, faculty, alumni, and guests; the Museum's 80,000 works of art; and traveling exhibitions

Fig. 8c 1996 concept for a new civic/community space

Fig. 8a Chace Center mid-sized auditorium

Fig. 8b Chace Center function space in the lobby

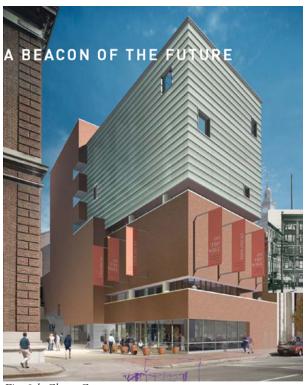

Fig. 8d Chace Center entrance

PRIORITY #4 — Additional Student Housing

The 1996 Campus Master Plan reaffirmed RISD's commitment to increase on-campus housing for its students. The advantages for this endeavor are many, including:

- (a) On-campus housing reduces the impact of students on market housing, parking demand, and surrounding neighborhoods; conversely, it reduces uncertainties and potential trauma that students may face in their search for housing — especially for foreign, transfer, and graduate students, a competitive source of talented students.
- (b) On-campus housing enables the school to improve student safety and enhance their collegiate experience and memories after they graduate.
- (c) The life of an institution of higher education, especially in association with a renowned museum, is often extended into evening and weekend special events, hosted lectures, and other extra-curricula activities that engage the larger academic environment, the general public, and visitors from nearby cities and states. On-campus housing provides RISD students greater access and opportunities to participate.

On-campus housing has made significant progress since 1996. Although **Dwight House** and **Colonial Apartments** (Fig. 9b) provided student housing before 1996, their renovations temporarily reduced the total housing pool when both were renovated after the *1996 Campus Master Plan*. Upon their respective completions in 1997 and 1999, the number of beds increased from 567 to 790. With the purchase of **Thompson House** (Fig. 9c) at 63 Angell Street in 1999, RISD's ownership of the block bounded by Benefit, Waterman, Prospect, and Angell Streets is complete and the original plan to expand the student enclave of **Residential Hill** (Fig. 9d) and the master planning goal of building 300 new beds appeared possible.

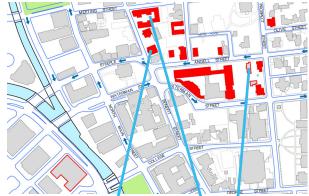

Fig. 9a Existing RISD student housing

Fig. 9b Dwight House (l) and Colonial Apartments in 1996

Fig. 9c Thompson House on Nickerson Green in 1996

Fig. 9d Residential Hill in 1996

However, neighborhood resistance and the desire to preserve Nickerson Green as one of RISD's few on-campus recreational open spaces helped to refocus the School's attention when the tower above the future Library at 15 Westminster Street (Fig. 10a) became available and viable for conversion to urban housing.

The potential for 490 beds in three different apartment configurations, including studio lofts, exceed the 1996 Campus Master Plan housing goals endorsed and approved by the Board of Trustees. The additional beds will allow more than one-half of the student body to live on-campus by 2005 and provide some swing space to allow the renovation or sale of some "Outer Houses", and demolition of Farnum Hall (Fig. 10b), whose repair significantly exceeds its replacement cost. Thompson House (Fig. 9c) may also be adapted for reuse as a replacement Outer House in the northeastern quadrant of the campus.

15 Westminster Street will also provide new opportunities for social space — for both resident and non-resident students — including a student lounge and food service on the first floor near the Library. Additional function spaces for large gatherings and activities, and student club spaces, are currently planned for a future renovation of the penthouse.

Fig. 10b Farnum Hall

Summary of Student Housing: 25 beds Dwight House (1997) Colonial Apts (1999), 123 beds, new 27 beds 15 Westminster (2005) 490 beds TOTAL NEW HOUSING 542 beds **TOTAL HOUSING (2008)** 1,280 beds Thompson House (potential new) 16-20 beds) -58 beds) Farnum Hall (potential demo) Nightingale House (possible sale) -24 beds)

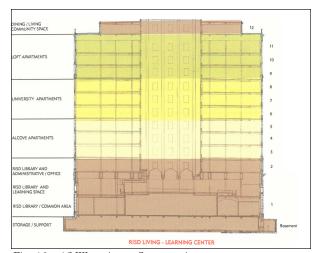

Fig. 10c 15 Westminster Street section

Other 1996 Goals

In addition to the aforementioned priorities, the 1996 Campus Master Plan identified several goals, including: promote projects that support the vitality of the downtown; expand parking capacity; address facility upgrades and renovations; and improve the infrastructure. Many of these issues, and more, have been implemented or initiated.

Reinforcing The Downtown

The reopening of the Providence River and completion of the Riverwalk has allowed RISD to redefine its western boundary. Former backdoors and un(der)utilized entrances to ISB, Design Center, Auditorium, and Market House, have become prominent portals between campus and riverfront. New initiatives have helped to expand the image of the institution and enliven the city's new waterfront (Fig. 11b), including:

- 1 graduate art studios in **Fletcher Building** (2000)
- 2 risd|works (2001)
- 3 risd|kids (2003)
- 4 new academic programs in **Mason Building** (2003)
- 5 RISD Store and its new café (2004)
- 6 a 490-bed residence hall and street-level café in15 Westminster Street (2005)
- 7 a new **Library** (2006)
- 8 Chace Center (2008)

The extension of new activities and adaptive reuse projects along the riverfront and in the downtown demonstrate RISD's contribution and commitment to improving and enhancing downtown Providence. An emerging effect of these activities is a reorientation of the campus, refocusing the center of gravity from the quaint historic environment of Benefit Street to the dynamic and resurgent Providence River—a unique *de facto* campus quadrangle for RISD. (Fig. 23)

Fig. 11a Riverwalk with RISD Store & risd|kids (left) and risd|works and 15 Westminster Street across the river (right)

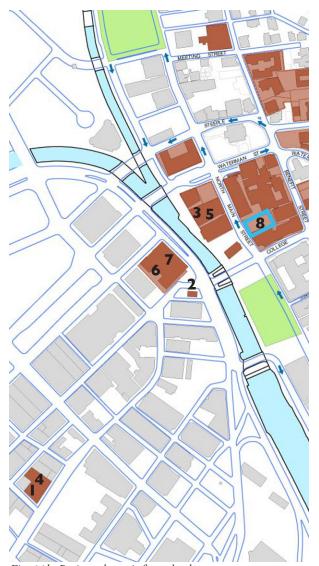

Fig. 11b Projects that reinforce the downtown

Additional Parking

Since parking spaces were tabulated in the 1996 Campus Master Plan, RISD has successfully added 106 new parking spaces — a 50 percent increase — including:

- (a) spaces in RISD-owned alleys and incidental lots
- (b) purchase of 161 South Main and 296 Benefit Street
- (c) an arrangement with Metropark at Capital

 Center's Parcel 6 for RISD cars with valid stickers when RISD lots are full (in the process of being revised towards the end of this study, and expires when redevelopment of the property commences)

Although the number of total parking spaces remains relatively small — especially in comparison to other academic institutions — RISD's new orientation towards downtown offers greater proximity to available parking across the river. (Fig. 13) General opinion among those interviewed indicates that available commercial parking lots and garages near RISD tend to be full during the day, and that walking distance for some Museum visitors may not be appropriate or desirable.

Future opportunities to expand the parking capacity on campus include:

- (a) SOMA Lots, especially to provide spaces to replace the loss of Metcalf Lot due to the construction of Chace Center
- (b) expiration and/or cancellation of commercial leases in SOMA, providing potential academic space and accompanying parking spaces
- (c) potential development of structured parking by RISD or in collaboration with nearby partners
- (d) remote parking lots in combination with an expanded shuttle bus system

(e) Public-sponsored garages

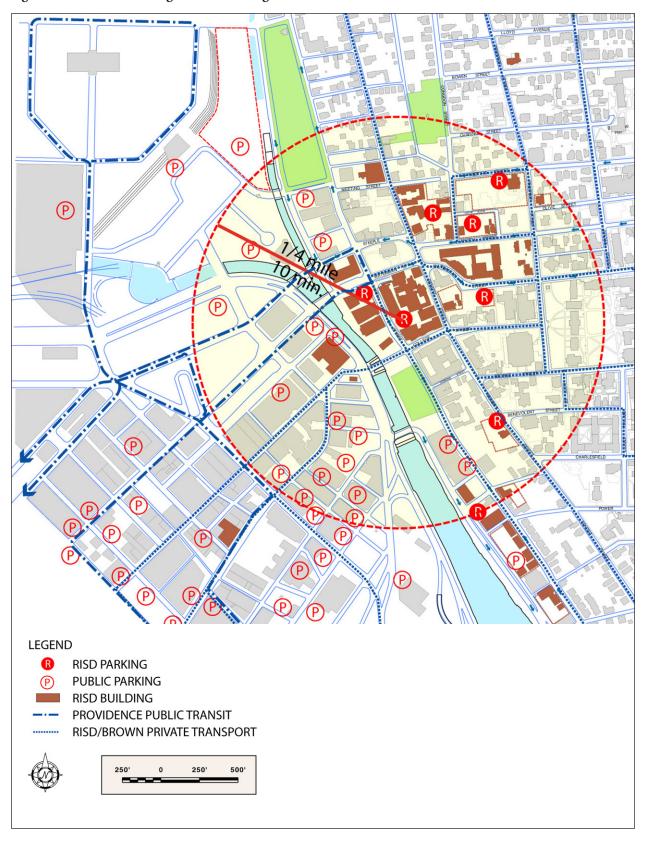

The feasibility of any alternative to increase the storage of cars present some fundamental challenges to physical and financial resources, and may require some adjustment to personal preferences and practices. Issues and/or alternatives that may be considered, include:

- sacrificing precious properties for parking that may be needed in the future for academic purposes, or that can be put into higher, better, or more profitable use
- allocating scarce financial resources towards garage construction or land purchases for parking lots
- (3) instituting fees for parking privileges that are closer to market rates (although RISD parking fees have increased significantly since 1996)
- (4) providing parking in less expensive/congested areas within a shuttle system whose costs of operation may be shared with other users
- (5) promoting initiatives that help infill un(der)utilized properties and provide street-level activities that would help diminish the visual and psychological impression of walking distances

Fig. 13 RISD/Public Parking Areas & Walking Distances

Renovations

Several recommendations for renovations in the 1996 Plan have been initiated or completed in key buildings, including: RISD Museum, 20 Washington Place, and eight separate spaces that were occupied by the Industrial Design (ID) Department before their consolidation in 161 South Main Street. When the renovation of Memorial Hall and portions of the Radeke Building are completed in 2007 as part of the RISD Center complex, over 100,000 net square feet of renovated space would be completed since 1996.

The impact of renovations has not only provided additional space to address academic needs but also helped to improve staff functions and services. In particular, administrative offices and student services have been consolidated at 20 Washington Place (Fig. 14b), allowing them to operate more efficiently and making most of them more accessible than their previous locations in Woods Gerry and College Building.

Infrastructure Improvements

Infrastructure improvements are often under-recognized and nearly invisible to the discerning eye, literally not unlike the electrical wires that travel throughout walls and connect all spaces and adjoining buildings. Included among the many infrastructure improvements that have or will be completed, include: chiller replacements; underground utilities; wiring for computers and communications; CodeBlue emergency phones; card access systems; mechanical ventilation; and campus lighting.

In addition to physical upgrades, improvements have included adding staffing and expanding programs, such as: a laptop program; the beginnings of wireless technology; One-Stop student services; enhanced recycling; a SafeRide shuttle bus system shared with Brown University; and a new Department of Environmental Health & Safety to monitor and initiate safeguards against unsafe conditions, such as eating alongside toxic art materials and hazardous machinery. Additional current initiatives include: a study of how materials — such as mail, supplies, and trash

Fig. 15 SafeRide network shared with Brown University

— enter and leave the campus; and a signage and wayfinding project to help guide visitors and improve campus identity and communication.

Summary of Infrastructure Improvements:

Utilities

• Resid. Quad chiller replacement (2004)

Master Utility Infrastructure Project (to provide chiller loop and electrical capacity to Central Campus and Auditorium blocks)

• Chace Center (2008)

Technology

- laptop program
- some wireless
- wired student residences
- network upgrade (ongoing)

Services

- One-Stop student services (Prov-Wash)
- Facilities online work order system (2003)

Public Safety

- SafeRide Shuttle Program w/Brown U
- CodeBlue emergency phones
- card access program (ongoing)

Environmental

- · recycling program
- new Department of Environmental Health & Safety
- additional ventilation
- campus-wide re-lamping program

Materials Delivery, Storage, & Disposal

• Material Management Study (2004)

Signage/wayfinding

 proposals for Chace Center/15 West (2004)

Recommendations Not Implemented

Several recommendations from the 1996 Campus Master Plan have not been implemented, including: (a) conceptual design studies of facility improvements and physical planning not based on specific programmatic needs; and (b) renovations that continue to appear in reports, studies, commentaries, and discussions, and have become more urgent.

Design Studies

- (a) a multi-level galleria behind Metcalf Building to replace the existing dark double-loaded corridor, allowing larger and improved daylighting of studios
- (b) a 2-level rooftop addition above Metcalf that is apparently and structurally allowable
- (c) an ISB addition in adjacent ISB parking lot
- (d) an addition to 161 South Main Street in its adjacent parking lot
- (e) a narrower roadway and wider, redesigned sidewalks along Washington Place between Prov-Wash and ISB to create a civic gateway to RISD and College Hill
- (f) a narrower Waterman Street to create a wider and safer sidewalk on the campus side of the street between South Main and Benefit Streets

Emerging Urgent Projects

Reinforced by the *Academic Plan* and *Facilities Needs*Assessment Report, major, critical renovation needs have been identified, including: **ISB** (Fig. 16a), **Auditorium** (namely, FAV and Apparel Departments, Fig. 16b), **Bank Building** (Fig. 16c), **College Building**, and **Carr House**. (Fig. 16d) While some cosmetic improvements have been completed in ISB and College Building, neither initiative has addressed larger systemic issues that require urgent attention and funding. An analysis of deferred maintenance and level of required capital improvement projects (Figs. 30 & 31) illustrates the severity of needs.

Fig. 16a Typical Illustration studio in ISB

Fig. 16b Apparel studio in Auditorium

Fig. 16c Bank Building interior

Fig. 16d Carr House

New & Evolving Challenges

By 2008, RISD will complete the top recommendations identified in the 1996 Campus Master Plan and showcase a transformed campus that will include new landholdings, new facilities, and new academic and professional programs. The changes since 1996 have been well-guided by the priorities identified in the Strategic Plan and core values/planning assumptions reiterated in the Academic Plan — in particular, to promote an institutional agenda that will sustain RISD as one of the best and most innovative art schools and museums in the world, and maintain RISD's competitive position among its peers.

The transformed campus and emerging new challenges suggest a need for new initiatives to help sustain and support the overall physical and social environment for teaching, learning, working, and living, and allocate resources appropriately and efficiently. In addition to unimplemented — but still relevant recommendations from the 1996 Plan — new challenges that face RISD include:

- (a) identifying **instructional space standards** to more accurately determine and (re)calibrate space needs (See Table 33)
- (b) responding to **pedagogical changes** or new academic initiatives (e.g., new graduate programs or increased instructional use of technology)
- (c) addressing unmet programmatic needs (e.g., space for academic programs, Museum galleries, curatorial functions, educational space for children programs)
- (d) solving **intermittent space demands** (e.g., sponsored research projects, midterm and end of semester crits, special events)
- (e) meeting **technology pressures** (e.g., new equipment, services, infrastructure)
- (f) maximizing flexible space for multiuses and multi-

- tasks, especially for contrasting purposes (e.g., 'clean' spaces for graphic design versus 'dirty' spaces for sculpture)
- (g) fulfilling a demand for student spaces (Table 18) to support a growing resident population, recreational needs, and social activities
- (h) providing **health-safety** breakout spaces (Fig. 18b) outside studios as safe havens away from toxic materials and hazardous equipment
- upgrading ventilation and electrical distribution in studios
- (j) expanding **parking** to accommodate faculty/staff, and provide convenient access to the Museum and the college
- (k) increasing dedicated space for Continuing Education to enhance revenue growth
- improving efficiency, management, and consolidation of student housing, particularly renovations of Outer Houses and Residential Quad facilities
- (m) continuing the reorientation of the campus towards the riverfront & downtown to enhance RISD's identity, connectivity, communication, and consolidation of 'public' functions, such as Admissions and other currently dispersed administrative offices
- (n) disposing and/or replace facilities that do not adequately serve current or long-term needs and goals

Enhancing Community

Until the construction of the RISD Center and renovation of 15 Westminster Street are complete, social and student spaces continue to lag behind recommendations identified in the 1996 Campus Master Plan, especially as RISD spreads its campus away from its historic campus core. The endeavor to enhance the campus environment to attract and retain the best students suggests a need to provide additional social space to satisfy a unique student culture.

Student Social Space

A 1994 survey of student opinion found RISD students to be enamored with their work and workplace (Fig. 18a), and up to 98% indicated that they would spend their free time working on their projects in studio if given the opportunity. However, 77% of the students also felt a need for more extracurricular and social opportunities on campus. The latter deficiency was reinforced by that fact that 92% of students felt low satisfaction with their personal and social lives. By 2002, there was a more positive shift in student satisfaction with their personal and social lives but a continuing decreasing dissatisfaction with the amount of extracurricular programming.

When completed in 2008, Chace Center and 15 Westminster Street will provide significant new resources for student extracurricular activities, including meeting rooms, student exhibition space, a mid-sized auditorium, new dining facilities, and student lounges. Student representatives interviewed in 2004 reinforced 1996 student opinions that do not favor stereotypical student centers that are found on many college campuses. In contrast, RISD students favor social spaces that are informal and correspond to concentrations of student activity — such as popular circulation paths, studios, or galleries.

Despite the future addition of Chace Center and 15
Westminster Street, there may still be insufficient student social space, based on conventional space standards.
(Table 18) Since 1996, the importance of social space has become more exigent for at least four reasons, including:
(1) overall under- or unfulfilled needs; (2) health and safety concerns to separate eating and student lounges from potential toxic materials and hazardous equipment in the studios; (3) inadequate opportunities for comfortable respite spaces (Fig. 18b); and (4) changes in student social and recreational needs — partially supported by the

evidence of the current 31 student clubs and organizations — and greater interests in physical fitness. Although student recreational and interests tend to evolve over time, RISD students have had a creative history of using and enjoying social space wherever they can find or make them. (Fig. 19a)

Faculty and Staff Social Space

As it is for students, it is important for faculty and staff to have adequate social space. In addition to providing respite from the workplace, faculty and staff social spaces would allow opportunities to interact with students in a more private setting, and provide more convenient opportunities to interact with colleagues, both within and outside the institution. Currently, the Registrar's database reveals only one small space formally identified as a faculty and staff lounge. One can only conclude that the majority of social settings is provided by whatever unassigned space is available and by on-campus and local commercial cafés and restaurants. RISD's faculty and staff size suggests a need of approximately 10,000 square feet of space (Table 19), preferably distributed across the campus.

Special Event Social Space

Currently, there is no facility on campus to host a dinner for up to 200 participants attending special events, such as: parent and alumni receptions; holiday parties; Board meetings; conferences; and events that support partnership programs with corporations and donors. If located near the riverfront, such a space could further enhance RISD's image in the public realm, help expand its presence in the downtown, and increase its revenue opportunities. Defining the need, type, quality, and location of a special event space relative to other pressing needs of the campus would be a decision to be made for the next campus master plan.

D	Estimated Staff Social Space Needed	(A * C)	10,000
	Staff Social Space Deficiency	(D-B)	9,775

Fig. 19b A typical museum gallery

RISD Museum As Resource

An institution in its own right, the RISD Museum serves a broad spectrum of Rhode Island, from art patrons to grade school children, as well as the college as a whole. As an *institution*, the Museum has been an educational resource that supports the college's degree programs. As a museum *building*, the facility can be an inspirational resource and place of respite (Fig. 19b) from academic life and urban stimuli that surrounds the School. Through limited interviews in 1996, and again in 2004, student representatives have indicated a need and a desire to improve and expand awareness of, and access to, the Museum's resources — both educational and social — especially with the additional improvements that are planned as part of the RISD Center.

Outdoor Spaces

Outdoor spaces represent the middle ground of social spaces that have multiple roles at RISD, including: (a) formal settings that identify or represent RISD the institution, such as Market Square (Fig. 20a); (b) formal settings that serve as entry points or processions to various RISD facilities, such as Farago courtyard (Fig. 20b); and (c) informal settings that are prominent but are largely venues for leisure and social activities, such as The Beach and Frazier Terrace. New outdoor spaces at the new RISD Center, including the entrance plaza, covered archway, and stairways, may also become popular since all will be situated along important pedestrian paths. Whether prominent in their own right or associated with key buildings or areas of the campus, outdoor spaces provide opportunities to promote a sense of identity and place for RISD and offer attractive venues for pedestrian and social activities. Appropriate programs for pedestrian enjoyment and safety — including comfortable seating, lighting, and planting — should be part of the ongoing improvements of these

Accessibility & Wayfinding

spaces where amenities may be deficient.

As the campus evolves, access and wayfinding may be less clear and direct, especially for those with physical disabilities. Examples of inadequate handicapped entrances (Figs. 20c & 20d) indicate that an overall evaluation may be needed to improve access for the disabled. In general, the hilly terrain between the extremes of the campus — a traditional inconvenience at RISD — has become less of an encumbrance as academic functions migrate towards the riverfront. As the center of gravity of the campus shifts towards the river, RISD may consider compacting the campus by reevaluating some of the properties that lie on the outer fringes of the campus core (Fig. 23) in order to clarify and reorient key functions in relation to campus identity.

Preparing for the Next Campus Master Plan

Upon completion of the RISD Center in 2008, each of the four top priority recommendations identified in the 1996 Campus Master Plan would be completed. A new campus master plan would then be appropriate to guide the institution forward, identify new priorities, and address unresolved issues identified in the 1996 Plan that still appear to be current, if not urgent, today.

MASTER PLANNING PRINCIPLES

Together with the 2000 Academic Plan and 2003 Institutional Master Plan, RISD is poised to preparing for a new campus master plan. Principles established for the 1996 Campus Master Plan helped guide the mission of the work and merits reconsideration, if not reaffirmation, for the next campus development initiatives:

- Address academic space needs
- Strengthen the joint college/museum mission
- Increase housing for students
- Take advantage of the waterfront
- Make the campus understandable, 'friendly', and beautiful
- Promote community
- Promote flexibility in use
- Support technology
- Address deferred maintenance

- Expand and strengthen infrastructure (telecommunications, electrical, heat, air-conditioning, water)
- Promote non-tuition revenue (CE, retail. etc.)
- Affordable action (financial equilibrium)

URGENT ISSUES

Among the list of issues to be addressed, the next campus master plan should include several items that resurfaced during this *Campus Master Plan Update* as not having been adequately addressed or requires priority attention, including:

- Renovate ISB, Bank Building, College Building
- Find an appropriate solution or space to expand FAV and/or Apparel Design departments
- Find an appropriate location to consolidate and expand the Furniture Department
- Develop a strategy to allow the Museum to expand, especially its Education Department
- Consider disposing of high-maintenance or obsolete properties as a means of controlling expenses

ADDITIONAL ISSUES

Additional problems or issues that appear to be less urgent but may require additional attention or study include:

 Address student life needs, including the location(s) and amount of student social space (particularly in 15 Westminster Street)

- Understand and mitigate cultural issues between faculty/students of the School and faculty/students of Continuing Education
- Improve and strengthen student relationship with, and access to, the Museum
- Develop a strategy for swing space in order to address upcoming renovations and future academic needs

PREPARATORY CONSIDERATIONS OR STUDIES

Some supplemental work may be necessary in order to establish concensus and prepare criteria for the next campus master plan. Areas of study include:

Planning Agenda

- (a) Determine and affirm strategic/academic priorities
- (b) Determine and establish departmental standards for instructional space
- (c) Define RISD/campus identity issues
 - · sprawl vs. distinct centers
 - campus entrance(s) and/or gateways
 - · signage and wayfinding
 - location of Admissions or a visitor's center
- (d) Consider how the campus could or should be reorganized to allow greater flexibility for growth and change, including moving some departments to another location or sub-campus
- (e) Develop a master plan for SOMA, including options to develop it for RISD use, for revenue income, or a combination of both
- Maintain/improve communication with RISD constituency to foster concensus and community
- (g) Maintain cordial relationships with neighbors, citizen associations, and the City
- (h) Develop goals for the next capital campaign

Programming Agenda

- (i) Determine departmental programmatic needs
- (j) Review subcampus formulation and character
 - · divisions, departments, and majors

- undergraduate and graduate
- student residences and services
- strategy for efficient and economic distribution of uses & resources
- (k) Consolidate administrative functions at riverfront
- (l) Expand shared facilities (May require some cultural adjustment)
- (m) Adjust the curriculum schedule to avoid classroom use conflicts, promoting a more efficient use of facilities and reduce the need for more space

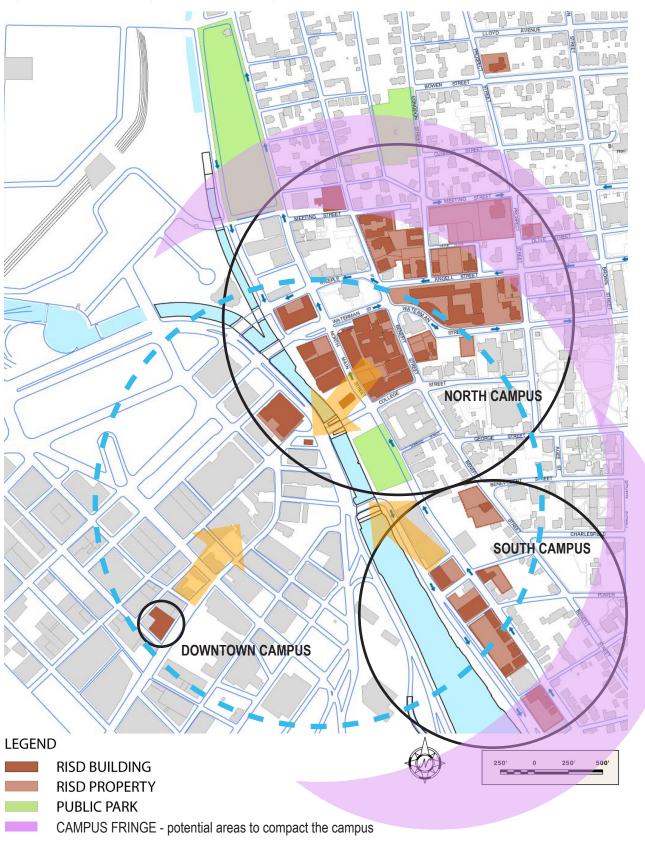

Property Management Agenda

- (n) Renovate and upgrade deficient spaces to reduce the pool of undesirable and underutilized classrooms, diminishing the perception of inadequate space
- (o) Investigate property trades with neighbors to better organize the campus
- (p) Sell excess/underutilized/high-maintenance properties for revenue and reduce expenses
- (q) Increase revenue enhancement activities (e.g., enrollment; professional/summer programs; corporate collaborations; conferences; commercial leases/development; Tillinghast Farm development)
- (r) Add to low structures to maximize Floor Area Ratio (FAR) allowed by zoning
- (s) Demolish inefficient properties to maximize FAR for redevelopment
- (t) Build on available RISD lots (Requires complementary replacement parking solution)
- (u) Acquire properties between campus hubs to improve identity, connectivity, and community between hubs

Facilities Maintenance & Upgrades Agenda

- (v) Expand programs of sharing facilities, systems, and services on campus and with other institutions
- (w) Utilize technology to reduce cost and increase efficient use of space and energy
- (x) Implement/increase program for Green architecture, landscape, and sustainable standards

Fig. 23 Campus center of gravity in 2004 shifting towards the riverfront in relation to campus fringe areas

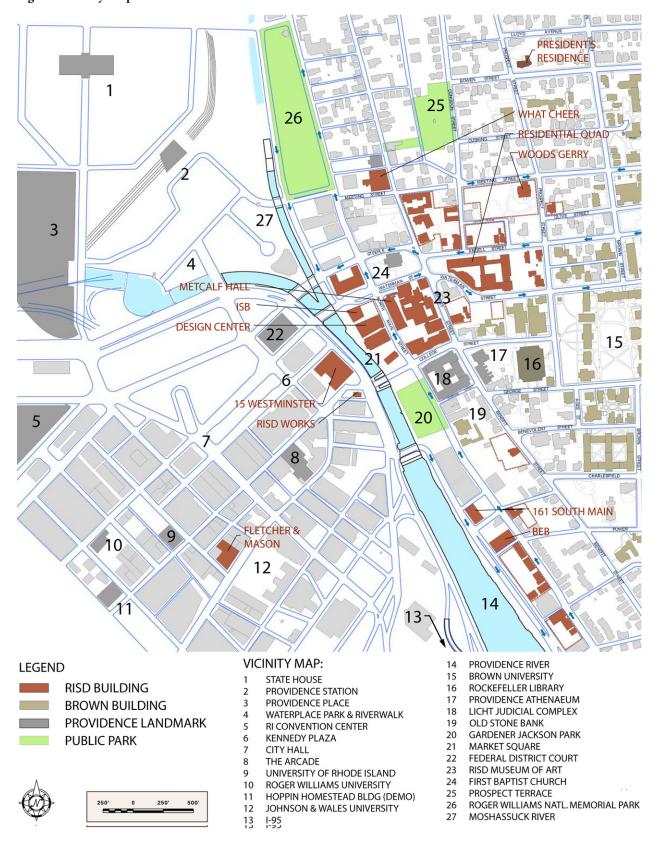

Fig. 27 RISD-owned parking and transit map

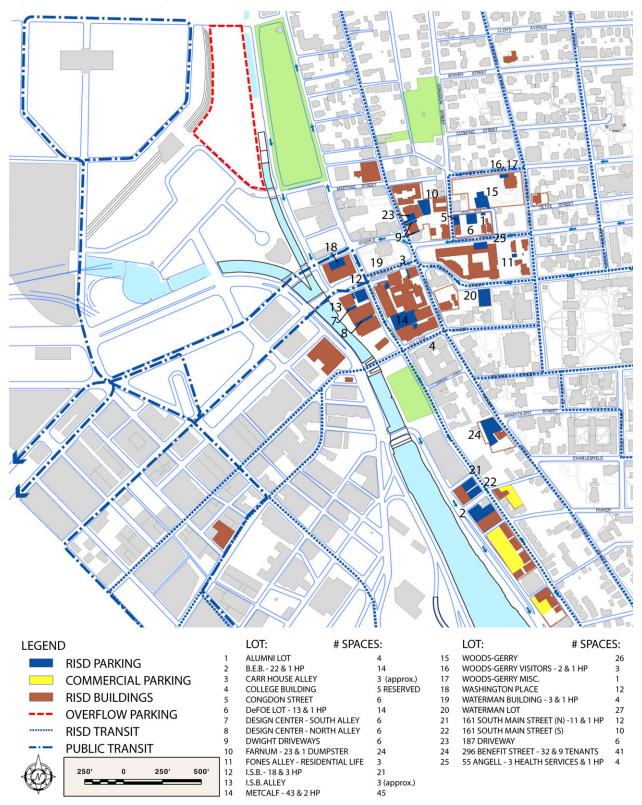

Fig. 28 Map of relevant zoning areas

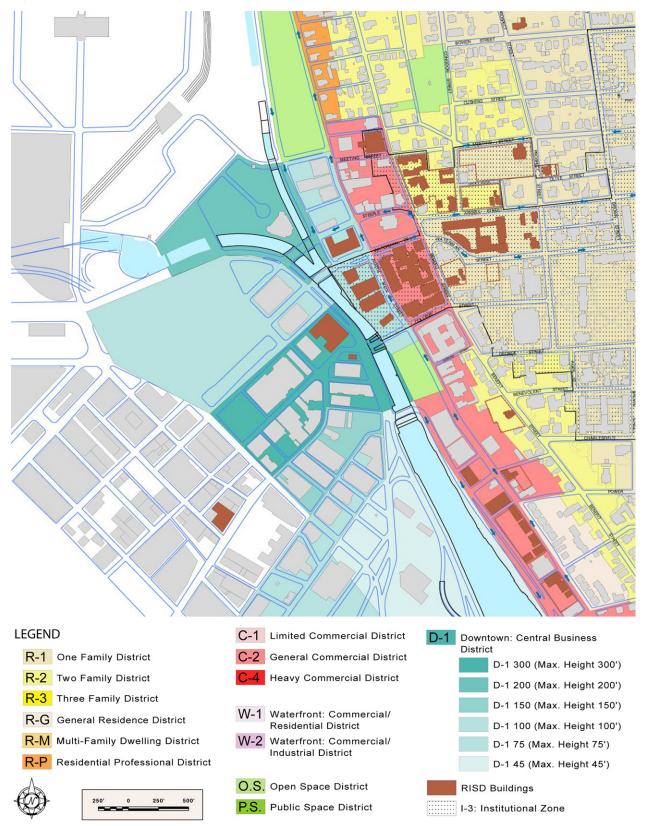

Fig. 29 Summary of relevant zoning regulations

R: RESIDENTIAL

Max. Height: 2 stories or 30 feet

- -Height may be increased to 3 stories (but <40 feet if each side yard is increased 1 foot for each 3 feet in height above 2 stories (or 30 feet), whichever requires the greatest increase
- -Rear yard may be reduced to less than or equal to 20% of lot depth if front & rear yards totals

less than or equal to 40% of lot depth

- -One side yard may be reduced to 4 feet if lot width is less than or equal
- -Corner lot coverabe may be increased by 5% of lot area

C-2: COMMERCIAL DISTRICT

Max. Height: 45 feet or 3 stories

D-1: DOWNTOWN CENTRAL BUSINESS DISTRICT

Max. Height: varies

- -No setback at street level
- -R Zone front yard requirement applies if site is across the street from an R Zone

I-3: INSTITUTIONAL ZONE

Max. Height: 35 feet or 2 stories

- -Max. height less than or equal to height of any R Zone not overlaid by an I-3 Zone within 150
- -Allowable height shall be determined by the most restrictive height according with the following requirements: 1) 30 feet when any part of the institutional building is on a street line and R Zone is across the street; 2) 40 feet whenever any part of the building is located 30 feet from any R Zone property line, but may be increased by 1 foot for every one-foot setback from the street line, up to a maximum height of 75 feet or 6 stories; 3) In all other cases, maximum height less than or equal to 75 feet or 6 stories; 4) setback distances in Items 1 and 2 are not required for lots in R Zones that are overlaid by an I Zone
- -If the lot is used solely for residential purposes, maximum height is 6 stories or 75 feet -When the block frontage is partly in an R Zone, but not overlaid by an I-3 Zone, the R Zone
- front yard requirements apply
- -If across the street from an R Zone not overlaid by an I-3 Zone, the R Zone front yard requirements apply
- -When a lot abuts an R Zone not overlaid by an I-3 Zone, min. yard is 30 feet
- -When a side yard abuts an R Zone not overlaid by an I-3 Zone , it shall be less than or equal to 4 feet for each story or each 12 feet in height, but not less than 6 feet
- -When a rear yard abuts an R Zone not overlaid by an I-3 Zone, it shall be greater than or equal to 20% of lot depth but less than or equal to 20 feet

O.S.: OPEN SPACE DISTRICT

-This zone is intended to insure tha open space areas, conservation areas and outdoor recreation areas are preserved in the city. This district includes parks, wetlands, flood plains, conservation areas and areas that cannot be developed.

		(3)	Projects in which	renovation costs	exceed	replacement va	lue.	·		

Some key observations from the Summary of Facility Needs Assessment & Capital Improvements, include:

- (1) The ARAMARK Report and RISD Facilities Department agree that 4 projects rank highest in need of improvements: Mem Hall, Woods Gerry, ISB, and Bank Building. Of these, Bank Building and ISB are also rank highest by Academic Affairs. Other projects noted above also stand out although there is a mixed of ranking values between ARAMARK, Facilities, and Academic Affairs.
- (2) The cost of improvement for Farnum Hall is for its complete demolition, due primarily to structural problems. In lieu of demolition, the estimated cost of renovation is approximately \$4,800,000, 20% over its replacement cost. Upon demolition, 58 student beds would be lost.
- (3) Like Farnum, the renovation costs of several other projects (identified in blue) exceed their respective replacement value, a differential that would increase the longer that work is deferred. Of these, Bank Building, Mem Hall, and Carr House lie in the dense, historic core of the campus, and whose preservation may outweigh the comparison between renovation costs and replacement values. Most of the other 'blue' properties lie on the edge of the campus; namely, Woods Gerry and five Outer Houses.
- (4) The 'blue' Outer Houses represent 10% of the total housing replacement value but nearly 30% of the housing renovation costs (excluding Farnum.) There are currently 79 beds in four of these houses (no student beds in Thompson House), representing 10% of total student housing.

Notes:

- 1. Source: RISD Fact Books 2004 & 2005
- 2. Changes in space include additions of new facilities, such as Fletcher and Mason Buildings.
- 3. Changes in enrollment include new and expanded graduate degree programs.
- 4. Since art programs, enrollment sizes, and pedagogy vary significantly among top-ranked art schools, there does not appear to be a definitive space standard in which to compare RISD's space use. In order to more accurately determine space use and needs, a methodology to understand and determine space standards needs to be developed, whether by an independent consultant or through self-study by each department under the guidance of the Office of Academic Affairs.
